

What is the advantages of Pongee long range RFID product comparing with other brand ?

a. For the active card PFH-620/320 (6 meters/ 3 meters) :

We have the dual frequency (125KHz / 433.9MHz) special design for power saving, which can work in the standby mode to lengthen the battery life even kept it in the power on state, until it is approaching to the 125KHz long range RFID reader PFH-9210-620 within the reading distance, it will be waken-up to transmit the 433.9MHz signal to the reader.

b. For PP-2752 Access Controller :

This is a dual gate design access controller which connect to 2 sets RFID reader PFH-9210-620 and 2 parking barriers for both IN and OUT thru 9-P connector (Blue) and 8-P connector (White).

c. For long range RFID reader PFH-9210-620 :

A special design for Vehicle loop detector or IR photo beam sensor.
