#### For example :

You can set the valid/invalid date of card number by software and can designated to upload the time of valid/invalid date. When the time is up, it can upload valid or invalid date to reader at the same time, so you can set valid and invalid card to achieve the access control by administrator.

### Instructions: Login administrator account and password

Please log in to the administrator account system first

Account name: pegasus Password: pongee

2 : Click the menu "Setting (S)" and show drop-down screen window then click "Reader Setting"(as left showed)
