

RFID 125KHz Dual Decoding Read Module

RFID 125KHz ASK/FSK Read Module

PIEH- SYN

Ver.18.1

● Introduction

The 125KHz proximity reading module equipped with the **ASK / FSK** dual decoding circuits to read the both EM & H.I.D. cards or tags into UART formats. In this version, we output the UART signal by external jumper selection.

● Features

- 125KHz proximity dual decoding technologies reading for EM, TEMIC, H.I.D. cards at the same mode.
- Embedded with internal antenna or external bigger antenna at the same model.
- Epoxy potted for weather resistant with reliable quality.
- Compact size with high performance.
- Ease system design for access control, fingerprint, mobile handheld device etc.
